

3M™ SecureFit™ Protective Eyewear

Designed to enhance comfort and wearability through 3M™ Science of Fit™ technology

Comfort of the Next Generation

3M™ SecureFit™ SF400 Series Protective Eyewear adds new features for style and comfort

3M understands how challenging it is to source and securely fit a diverse workforce with protective eyewear. That's why the original 3M™ SecureFit™ SF200 Series Protective Eyewear featured the proprietary self-adjusting 3M™ Pressure Diffusion Temple Technology – a scientific advancement that allows the temples to naturally adjust to individual head sizes and helps diffuse pressure over the ear, enhancing frame comfort without compromising the security of fit.

But the innovation doesn't stop there.

Introducing 3M SecureFit SF400 Series Protective Eyewear

- The same Pressure Diffusion Temple Technology for Security of Fit
- Soft, adjustable nosepads for even greater personalisation of fit
- More style
- More comfort
- Greater wearability

The Power to Protect Your WorldSM

3M

3M™ SecureFit™ 400 Series Protective Eyewear

Key Features

Soft, adjustable nosepads for even greater personalisation of fit

Polycarbonate lenses absorb 99.9% of UVA and UVB. Meet the requirements of EN166:2001

3M™ SecureFit™ SF200 and SF400 Series Protective Eyewear features patent pending self-adjusting 3M™ Pressure Diffusion Temple Technology – a scientific advancement that helps diffuse pressure over the ear, enhancing frame comfort while not compromising the security of fit across diverse workforces

Dual-injected, padded temple touchpoints for added comfort over the ears

Motion-inspired, contoured piping in bold, modern colour palette for an infusion of style
